

## REMARKS

The abstract has been amended as requested by the Examiner.

New claims have been entered. These claims recite that searching starts with a predetermined frequency value. The frequency value is within a known region of a channel. The known region of the channel is one where signals are most easily detectable. Scanning is within a frequency segment within the known region, also. As far as Applicant can tell, the references fail to teach or suggest these limitations. Reconsideration is accordingly respectfully requested.

***Please charge any fees other than the issue fee to deposit account 14-1270. Please credit any overpayments to the same account.***

Applicant respectfully submits that he has addressed each issue raised by the Examiner - except for any that were skipped as moot — and that the application is accordingly in condition for allowance. Allowance is therefore respectfully requested.
